

Jason AI Labs

Roadmap v1.0 - Curriculum Outline

Mission: Build practical AI skills to become an elite AI Technical Evangelist, AI Consultant, and creator of Jason OS.

Module 1: AI Foundations

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 2: Local AI with Ollama

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 3: Prompt Engineering

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 4: RAG & Vector Databases

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 5: AI Agents

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 6: MCP & Tool Calling

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 7: Building Jason OS

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 8: Automation Workflows

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 9: Evaluation & Observability

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 10: Enterprise AI

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 11: Technical Marketing & Demos

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Module 12: Capstone Projects

Each module includes: concepts, definitions, real-world examples, hands-on labs, GitHub project, quiz, and recommended reading.

Capstone: Jason OS, AI Demo Generator, Personal Knowledge System, Technical Marketing portfolio.
